BANK SENTIMENT INTELLIGENCE

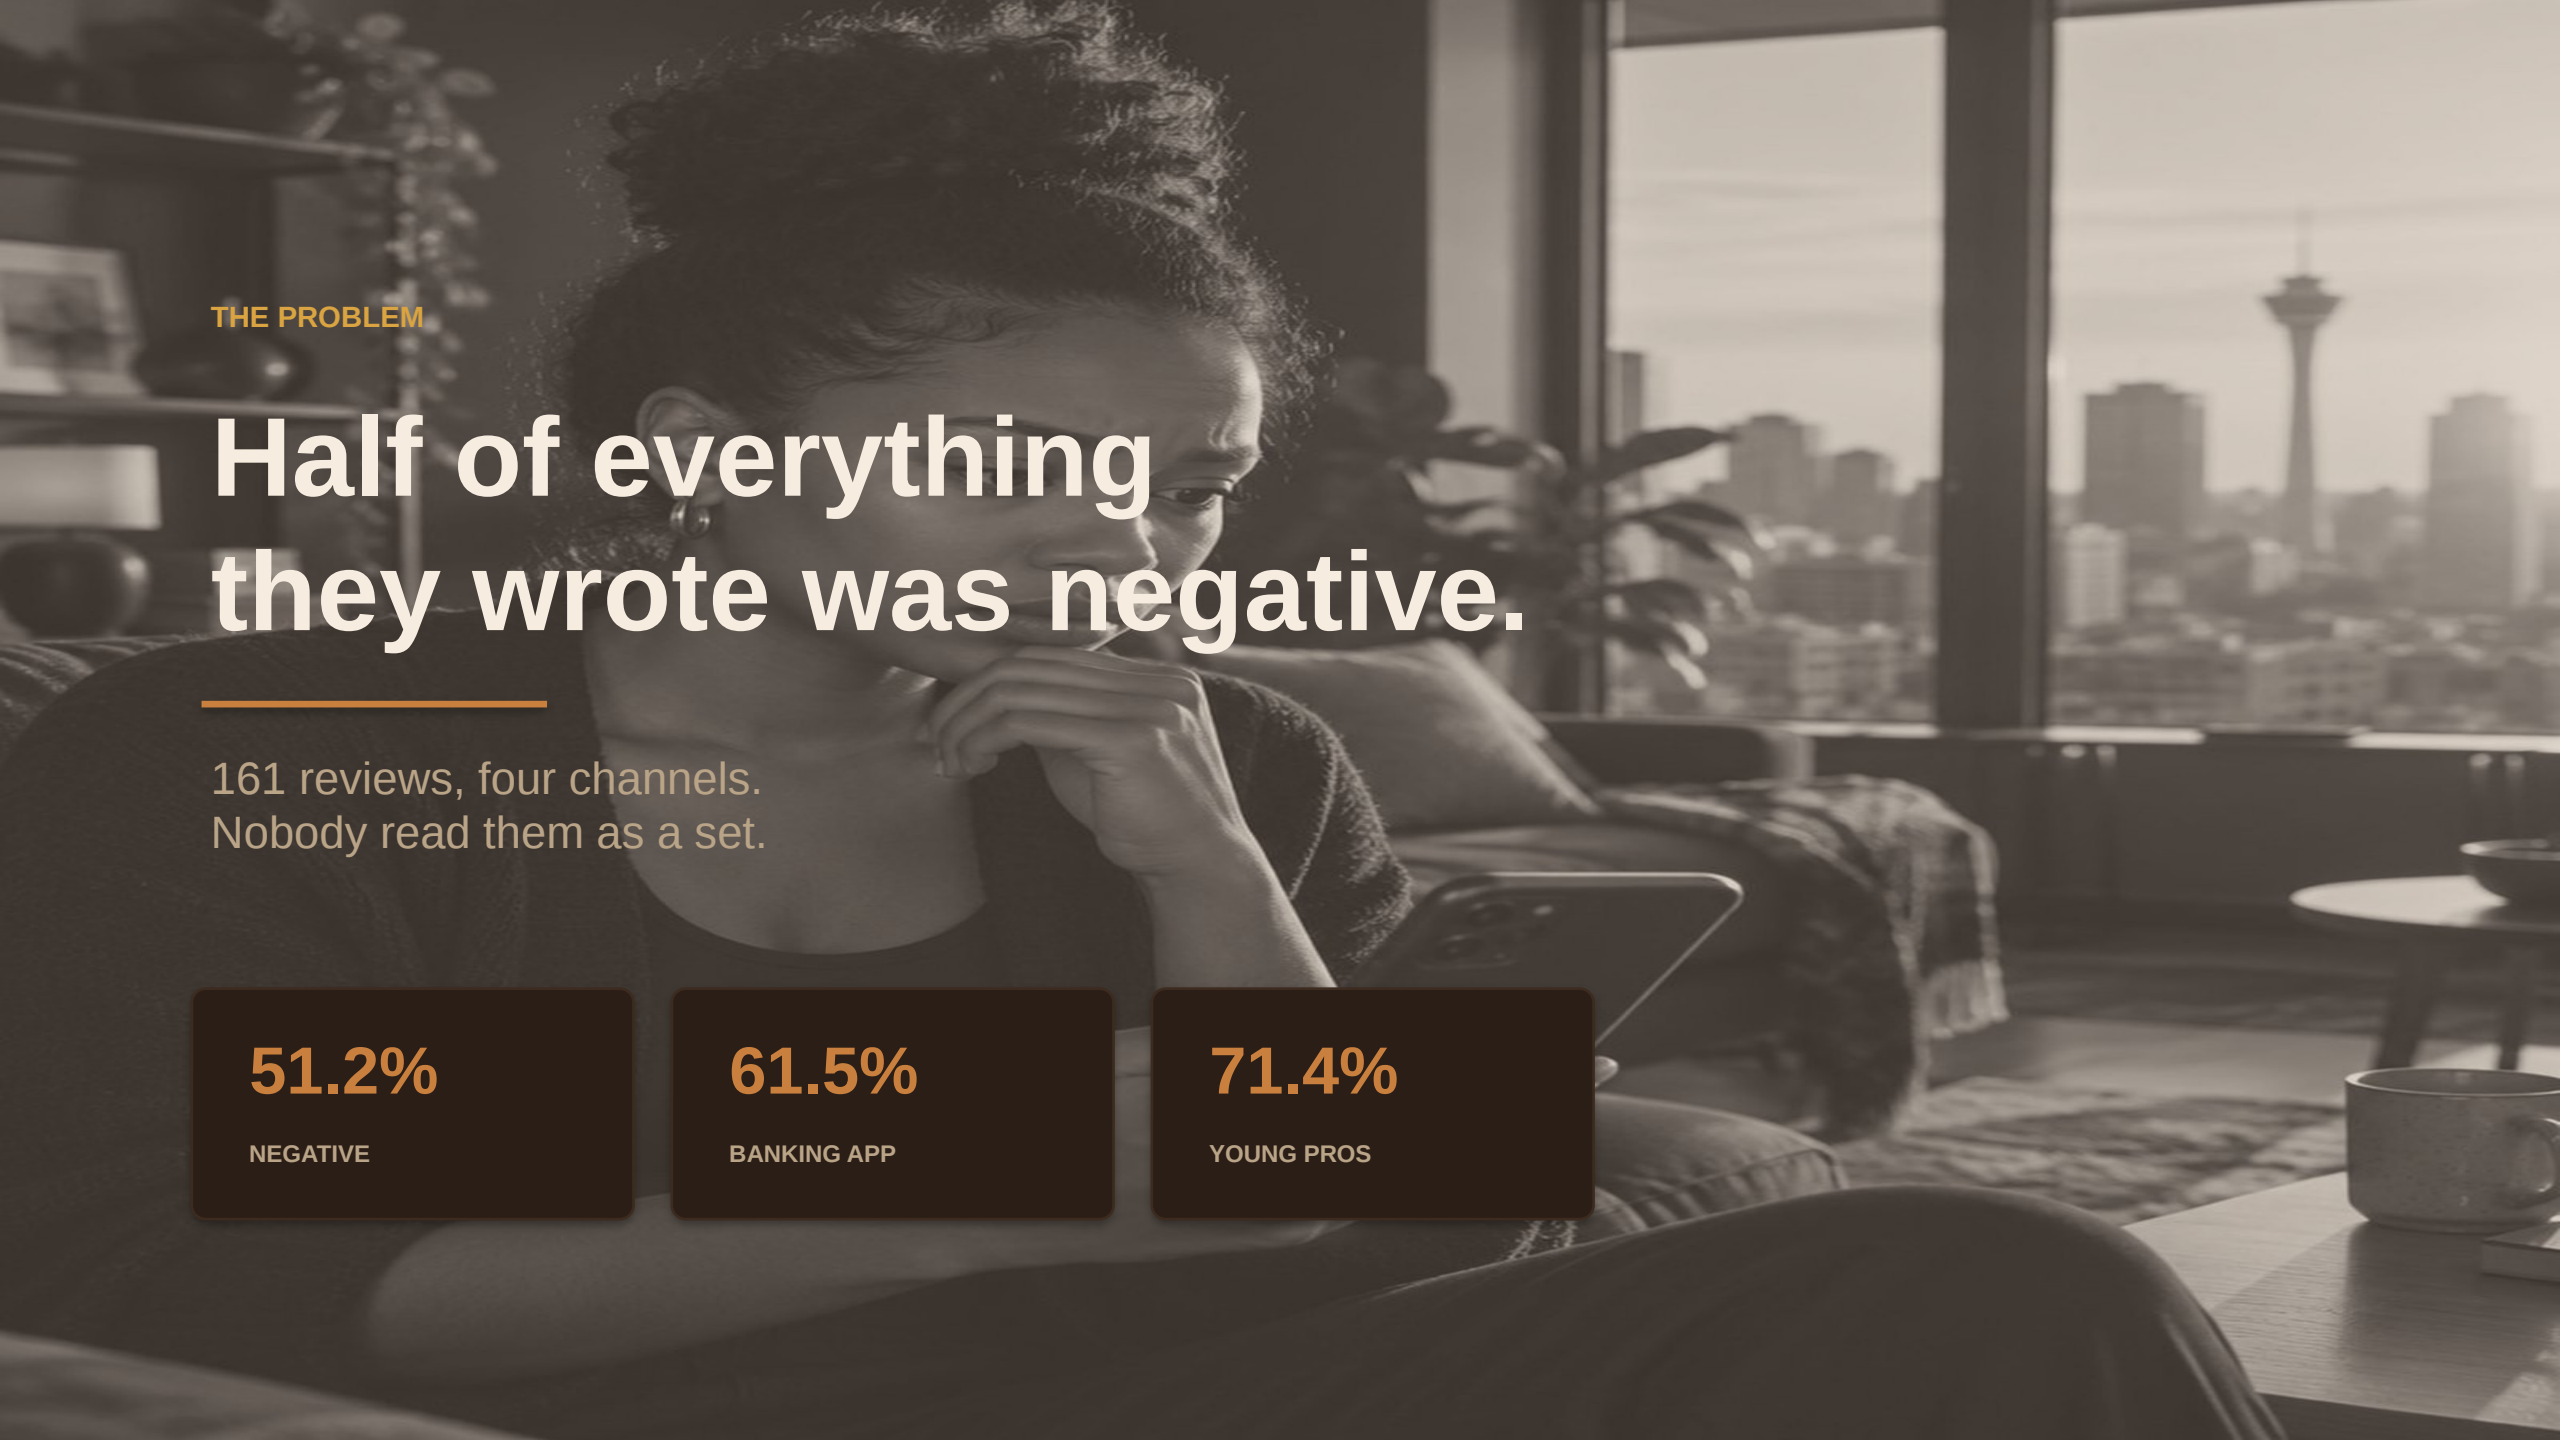

# Citi Analysis

## Your customers already told you.

Every review scored. Every channel ranked.
What to fix first, with the evidence.

**Tshepiso Freddy Thosago**

tshepisofrominnostation.github.io/banking-sentiment-dashboard

THE PROBLEM

# Half of everything they wrote was negative.

161 reviews, four channels.
Nobody read them as a set.

**51.2%**
NEGATIVE

**61.5%**
BANKING APP

**71.4%**
YOUNG PROS

THE SOLUTION

# Score. Segment. Prescribe.

**SCORE**

every review

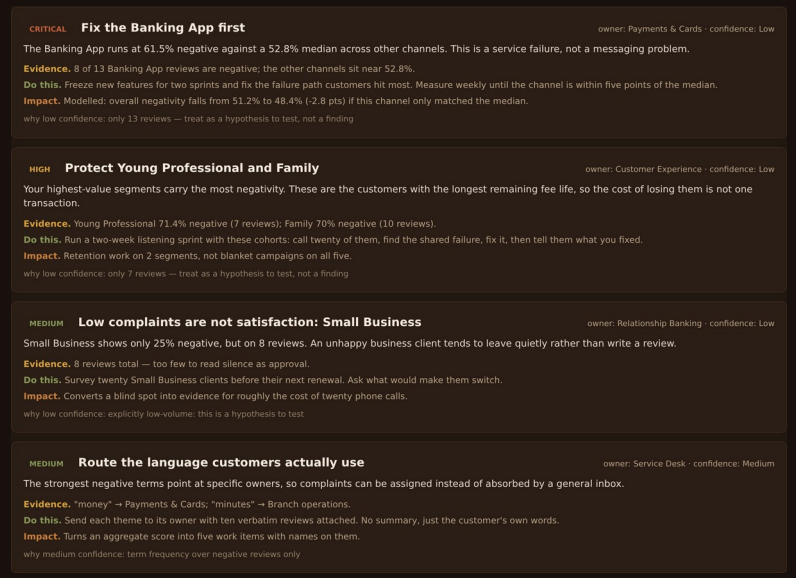

**SEGMENT**

channel + customer

**PRESCRIBE**

ranked actions

## Citi Advisor turns scores into the next decision.

**WHY IT SELLS**

Fix the app first:
-2.8 pts, modelled.

Every action shows its numbers and confidence.

THE STACK

# Boring on purpose. It cannot fall over.

**PYTHON**

scores reviews

>

**JSON**

scored records

>

**JAVASCRIPT**

runs on device

>

**GITHUB PAGES**

static hosting

**1,528**

lexicon entries

**96.9%**

parity with Python

**0**

servers, monthly cost

TextBlob in Python is the record of truth. The same lexicon runs in your browser.
